

V-6 PANTYHOSE MED. SUP. STOCKING

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies 140 den 18-22 mmHg pressure. It is produced by computer aided machines as the pressure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strengthened. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

Varicosis Stockings

V-7 THIGH MEDICAL SUP. STOCKING

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies 140 den 18-22 mmHg pressure. It is produced by computer aided machines as the pressure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strengthened. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-7A THIGH MEDICAL SUP. STOCKING WITH SILICONE

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies 140 den 18-22 mmHg pressure. It is produced by computer aided machines as the pressure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strengthened. Thanks to the silicone on the thigh part, it prevents the stocking from sliding. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-8 KNEE-LENGTH MED. SUP. STOCKING

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies 140 den 18-22 mmHg pressure. It is produced by computer aided machines as the pressure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strengthened. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-9 LIGHT PANTYHOSE MED. SUP. STOCKING

Petyhose light model is more transparent and thinner and applies 40 den 8/11 mmHg pressure, includes %84 polyamide, %16 spandex fibre. 5 sizes are available.

Varicosis Stockings

V-10 KNEE-LENGTH (UNISEX) MED. SUP.

Man knee-length model applies 14/18 mmHg pressure and includes %84 polyamide, %16 spandex fibre. Black, grey and dark-blue colors are available for men. Produced as 5 sizes.

V-11 PANTYHOSE MED. SUP. MATERNITY

Maternity model applies 40 den 18/22 mmHg pressure and includes %77 polyamide, %23 spandex fibre. The flexible part on the sacrum can easily adapt sacrum's shape along the maternity period.

Where to use: Used after the varicosis operations as a protector, for varicose veins and compression. Doctors recommend to use in order to relieve the pains in the legs, prevents vein problems.

How to use: First, toes are inserted into stocking then stocking is slowly pulled up to the legs without forcing.

How to wash: It is washed in max 30 degree water by compressing slowly without rubbing. It is rinsed with cold water and squeezed slowly by hand without curling. Do not use any bleaching liquid or wash-water, do not iron, and do not give to dry-cleaning.

Warning: If you want to use your stocking longer, please pay attention while putting it on/off. Long nails can damage the stocking.

V-12A ANTIEMBOLY STOCKING WITH WAIST BAND

18-21 mmHg, with open toe for inspection. Adjustable waist band. It is especially used after the hearth vein surgery. White color, Right & Left and 5 sizes according to world standards are available.

V-13 280 DEN KNEE-LENGTH MED. SUP. STOCKING

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies 280 den 22-27 mmHg pressure. It is produced by computer aided machines as the presure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strenghtened. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-14 280 DEN THIGH MEDICAL SUP. STOCKING

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies 280 den 22-27 mmHg pressure. It is produced by computer aided machines as the presure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strenghtened. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-15 280 DEN PANTYHOSE MED. SUP. STOCKING

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies 280 den 22-27 mmHg pressure. It is produced by computer aided machines as the presure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strenghtened. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-16 280 DEN THIGH MEDICAL SUP. STOCKING WITH SILICONE

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies 280 den 22-27 mmHg pressure. It is produced by computer aided machines as the pressure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strengthened. The silicone on the thigh part, it prevents the stocking from sliding. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-17 CLASS 3 PANTYHOSE MEDICAL SUP. STOCKING

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies Class 3 26-32 mmHg pressure. It is produced by computer aided machines as the pressure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strengthened. The silicone on the thigh part, it prevents the stocking from sliding. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-18 CLASS 3 THIGH MEDICAL SUP. STOCKING

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies Class 3 26-32 mmHg pressure. It is produced by computer aided machines as the pressure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strengthened. The silicone on the thigh part, it prevents the stocking from sliding. Biege color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-19 CLASS 3 LENGTH MED. SUP. STOCKING

Varicosis stockings are made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are closed. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies Class 3 26-32 mmHg pressure. It is produced by computer aided machines as the pressure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strengthened. The silicone on the thigh part, it prevents the stocking from sliding. Beige color, pantyhose, knee length, thigh length models and 5 sizes according to world standards are available.

V-20 280 DEN FRONT OPEN PANTYHOSE MED. SUP. STOCKING

Varicosis stocking is made from transparent lycra knitted in machines seamlessly and given anatomic shape of foot, ankle, calf, knee and thigh. It stays flexible. Toes are opened. The stocking, which is sewed in Italian way, has %77 polyamide and %23 spandex fibre and applies 280 den 22-27 mmHg pressure. It is produced by computer aided machines as the pressure on the ankle decreases along the calf. It is thin so that it does not restrict the motion ability. Heel and toe parts are strengthened. Beige color pantyhose model and 5 sizes according to world standards are available. The toe open and closed models are available.

V-21 ARM VARICOSIS STOCKING

Knitted from an elastic and soft fabric, the stocking provides usage in all day. The length starts from the wrist and finishes on the shoulder. 5 sizes are available. It used for oedema treatment.
