S-3 SILICONE INSOLE WITH BLUE AREA

The silicone insole is produced from two different kinds of silicon, one is soft and one is hard. The blue part is especially soft and ideal for the pains in hip, metatarsal region and heel. Can be washed in water. 6 sizes are available.

S-3A ECONOMIC SILICONE INSOLE

The silicone insole is produced from a second quality silicone and it is short lasting. The insole is ideal for the pains in hip, metatarsal region and heel. Can be washed in water.

4 sizes are available.

S-4 SILICONE EPIN CALCANIEN SUPPORT

The silicone insole is designed with a hole under the Epin Calcanien region. It is possible to use it as an epin support and heel support. Can be washed in water. 3 sizes are available.

S-5 SILICONE HEEL CUP WITH BLUE AREA

The silicone insole is produced from two different kinds silicon, one is soft and one is hard. Blue areas are designed as extra soft, especially used for heel spur problems. The insole produced in 3 sizes relieves the pain and provides a comfortable walk, can be washed in water.

S-5A ECONOMIC SILICONE HEEL CUP

The silicone heel is produced from a second quality silicone and it is short lasting. It supplies the patient to use a more economic one. It is ideal for the patients in heel and provides a comfortable walking. Can be washed in water. 3 sizes are available.

S-8 SILICONE HALLUX WALGUS REEL

The hallux valgus reel produced from silicone of high quality is located between the big toe and the second toe and used for correction of postural disorder of the toe. 3 sizes are available and it can be washed easily.

S-9 SILICONE BREAST FORMS

The breast prosthesis produced from silicone of high quality can be applied to both sides. According to bra sizes 14 sizes are available in flesh-pink

S-10 PROTHESIS BRA

It is produced for the patients who use silicone breast. The silicone breast forms are easily mounted into the cotton straps sewed to both side of the bra has a comfortable use. The shoulder bants of the bra has a last long usage. 2 colors are available in white and skin.

S-21 SILICONE TOE SEPARATOR

The mousturizer silicon toe separator used for sensitive toes decreases the friction in toes that have postural disorder. The mineral oil coming out over the time relieves the pain in the irritated parts between toes. Washable pre-shaped hypoallergenic toe separator maintains its form. Can easily be washed in water. 3 sizes are available.

S-22 SILICONE METETARSAL PAD

The Metetarsal Pad includes %100 silicone minaral oil. It adjusts perfectly to the metetarsal area and provides the same pressure of feet to protect the metetarsal area.

Indications:

Forefoot collapsed and deformations.
Callus of metetarsal area

S-23 SILICONE CALLUS BAND (Big)

The Callus band includes %100 silicone mineral oil. Adhesive bandage made from hypoallergic adhesive materials. It's open the callus region to protect pressuring of callus region. Pains due to place on the Hallux Walgus region are reduced.

Indications:

Hallux Walgus

Callus cases

S-24 SILICONE CALLUS BAND (Small)

The Callus band include %100 silicone mineral oil. Adhesive bandage made from hypoallergic adhesive materials. It's open on the callus region to protect pressuring of callus region. Pains due to the place on the Hallux Walgus region are reduced.

Indications: Callus cases

S-25 SILICONE HEEL BAND

The Heel band includes %100 silicone mineral oil. Adhesive bandages are made from hypoallergic adhesive materials. Pains due to the place on the heel region are reduced.

Indications: Heel and shoes deformation.

S-26 SILICONE BUNION PROTECTOR

The Bunion Protector includes %100 silicone mineral oil. Adhesive bandages are made from hypoallergic adhesive materials. Occurs of swelling and pressure due to first metatars-thumb articulation result is reduced.

Indications:

Hallux Walgus
Bunion

S-27 SILICONE METATARS PAD (FOOT CLINGING)

The Metatars Pad includes %100 silicone mineral oil. Adhesive bandages are made from hypoallergic adhesive materials. It adjusts perfectly to the metatarsal area and provides same distribution of foot pressure to protect pressure with metatarsal area.

Indications: Forefoot collapsed and deformations, callus of metatarsal area.

S-28 SILICONE METATARS PAD (OVAL CLINGING)

The Metatars Pad includes %100 silicone mineral oil. Adhesive bandages are made from hypoallergic adhesive materials. It adjusts perfectly to the metatarsal area and provides same distribution of foot pressure to protect pressure with metatarsal area.

Indications: Forefoot collapsed and deformations.
Callus of metatarsal area

S-29 SILICONE HAND THERAPY BALL

The Hand therapy ball includes %100 silicone mineral oil. It is used to exercise of hand muscular and hand exercises.

This times according to Mouse and keyboard uses increase hand syndrome to protect this syndromes.

Blue- Soft

Green- Medium

Red- Hard

Indications: After Apoplexy rehabilitation Hand muscle weakness

S-30 METATARSAL PAD WITH REINFORCED LOOP

The metatarsal pads includes %100 silicone mineral oil. The pad fixes the target area and prorate the pressure to the foot for protecting the ball of your foot and absorb the stress of daily walking and standing.

Indications: Forefoot collapses and injuries.
Metatarsal area corns

S-31 SILICONE TOE SLEEVE WITH VENTS(DIGITAL RING)

The toe sleeve includes %100 silicone mineral oil. Prevents the finger from overlapping. Cures finger and nail lesions and prevents corns.

Indications:

Finger and nail lesions
Corns

S-32 SILICONE BUNION PAD

The bunion pad includes %100 silicone mineral oil. Helps to protect Hallux Valgus swellings from pressure and friction. Prevents skin lesions, reduce the pain.

Indications:

Hallux Valgus
Bunion

S-33 SILICONE FINGER SUPPORT

The finger support includes %100 silicone mineral oil. Supports under foot fingers. Prevents corns and reduces the pain. Single-piece support can be put on and taken off easily. It can last longer than their foam counterparts.

Indications:

Hammer finger
Corns

S-34 SILICONE STICKY ARC SUPPORT

The silicone arc support, covered by fiber on the foot part is produced from a high quality silicone. Covering by fiber on the foot part. The sticky bandages is produced from a sticky hypoallergic item. It is excellently mounted into the inner foot arc and equally balances the pressure on the foot.

S-35 STICKY SILICONE METATARS SUPPORT

The silicone metatars support, covered by fiber on the foot part is produced from a high quality silicone. The sticky bandages are produced from a sticky hypoallergic item. It is excellently mounted onto the metatarsal region and equally balances the pressure on the foot.

S-36 STICKY SILICONE INSIDE-OUTSIDE SUPPORT

The silicone metatars support, covered by fiber on the foot part is produced from a high quality silicone. The sticky bandages are produced from a sticky hypoallergic item. It is optionally mounted into the inner or outer foot arc and equally balances the pressure on the foot.

S-37 STICKY SILICONE HEEL SUPPORT

The silicone heel support, covered by fiber on the heel region is produced from a high quality silicone. The sticky bandages is produced from a sticky hypoallergic item. It is optionally mounted into the inner or outer foot arc and equally balances the pressure on the foot. There is a hole on the Epin Calcanien region, relieving the pain, suooring a comfortable walking, 3 size of the heel support are available.

S-38 SILICONE INSOLE COVERED BY FABRIC

The silicone heel support, covered by fiber on the foot part is produced from a high quality silicone. It is excellently mounted into the inner foot arc and equally balances the pressure on the foot.

S-39 SILICONE INSOLE WITH HOLE

The silicone insole, is produced from high quality hard and soft silicone. The blue part is especially soft and ideal for the pains in hip, metatarsal region and heel. It has a high arc reinforcement for the sole disorder. The holes on the silicone provide the foot to take air. It can be easily washed with water
